

Token Swap Step-by-Step Guide

This document will provide you a complete instruction on how to perform a token swap using the Essentia Desktop application.

1 The first step for you will be to sign in to your account in the Essentia Desktop. If you don't have one yet, create it. The Desktop application can be easily downloaded using the official website.

- 2 If you hold your tokens anywhere but the Essentia native wallet, for instance on MEW, just import it into Essentia. **To do that:**
 - Get the wallet's private key,
 - Go to Essentia desktop,
 - Click on the "+" button,
 - Then push "Import".

• Then Choose '**Ethereum**' from the wallet menu. Enter your private key and voila - your Ethereum wallet is now imported.

- Then, all you need to do is to add your ESS tokens manually. To do that choose the ETH wallet you just imported and press '+' on the upper top corner of your wallet's menu.
- Press 'Add wallet'.

- 3 Also, make sure you have a certain amount of ETH on your wallet as well, in order to conduct the swap transaction.
- 4 When everything is set, go to the Wallet and click Token Swap.

5 Specify the number of tokens you'd like to exchange for coins

6 Choose the wallet where you'd like to receive your coins after token swap is completed.
